

I am a Ve with the ARRL and I do believe that the NCVEC use basically the same type of info to test the people for an Amatuer Licence. The team that I am part of have never had any problem giving any CW tests. They, like many other lazy folks that don't want to take the time to learn Morse Code and to learn a proven communication over voice have sent this petition in. I feel if it burdens them so much to send a 5wpm test (aprox 5 to 6 minutes) then they need to turn in their badges and paperwork because they can not be fulfilling their jobs that they have committed to, to furthering the Amatuer Radio Community.
